Refresh detected printers list **Check waste reset key** **Buy waste reset key**

This program can only function properly when your computer and printer are connected using a USB cable.
If you do not see your printer in the detected devices list, please try the following:

1. Check USB cable/connection
2. Cancel all printer jobs
3. Turn the printer off and then on again

After each of the above, try refreshing the detected devices list.

*Key was created 2013-09-05 15:27:39. This key has been used and is no longer valid. Requested key was used 2013-09-05 15:31:20 to reset Artisan 830. Client's network address (IP) during the reset was identified as 176.45.18.142 (SA). Your current network address (IP) identified as 193.93.53.123 (UA).

The screenshot shows the Epson L220 Series printer control panel. At the top, there are navigation tabs: Control, Supported models, News, and FAQ. Below these are several menu items: Waste counters, Ink levels, and Information. Each menu item has a corresponding button: Read waste counters, Reset waste counters, Check Reset Key, Status, Report, and List of supported errors. A large warning message is displayed in the center, stating: "Important! In order to apply all changes made to the printer you turn it off immediately (using the printer power button). Successful reset isn't completed until printer has been powered off and on again. Failure to restart the printer may result in all counters/states returning to their previous settings. Please, turn printer OFF now." At the bottom left, there is a "Refresh detected printers list" button. At the bottom right, there is a "Head ID" button. The background of the control panel is light blue with white text and buttons.

WIC Reset Utility

Congratulations. Your printer's waste counter(s) have now been reset.

Once your printer has shutdowns, you can then turn it back on and continue to use the printer as normal.

Please remember to replace the waste ink pads or fit an external waste ink tank.

Close

Refresh detected printers list

Please, remember, that fatal errors are not related to the waste overflow errors and they can not be reset by software.

If you experience communication errors or do not see your printer, please, try the following:

- Restart the printer and PC. Make sure that USB/Wi-Fi connection is of the good quality. Try to change USB cable and port if applicable.
- Disable status monitor and any Epson portal via printing preferences or task manager if they are supported by your system. [Click here to find out how](#)

Step 10. Power on in the front and the printer pads have been serviced and reset.
